ABOUT ME

After earning my mechanical engineering degree in 2007 at ISAE - SUPMECA, and working for a few years in the corporate world, I ultimately followed my childhood passion for music and the guitar.

After 10 years of accompanying artists on stage and in the studio as a guitarist and composer, the COVID period gave me the opportunity to discover the world of computer programming. It became a passion

As a self-taught programmer, I learned coding the same way I learned music—by doing, focusing on projects rather than following overly theoretical courses that were often far removed from the challenges and problems of a "real" application.
